

Cloth diapers essentials

We recommend a certain number of cloth diapers and diaper covers that allow you to keep your baby comfortable. How many cloth diapers you need depends entirely on how frequently you are willing to wash them.

In our experience one full load with 60 ° laundry is due every three days at the latest. Babies need a nappy change around 5 to 6 times a day, which is why we recommend 20 diapers as a good basis. One day for air-drying has already been taken into account.

Diaper covers do not need to be washed after every use; it is often sufficient to quickly rinse them with water. A selection of 2-3 diaper covers per size will meet your needs.

In addition, we recommend a pack/roll of diaper fleece and you're all set.
